

Infinite Aged Care, Toowoomba Qld

Infinite Aged Care is a long-term Australian residential aged care provider. Recently, Infinite Care expanded into Queensland with three new facilities in South East Queensland, including one in the regional city of Toowoomba.

Project Design Brief

Designers needed to incorporate an underground stormwater tank to collect runoff from a combination of different areas on the site. The detention tank would store surface water collected from hardstand areas, as well as water collected from various roof structures. Designers needed the tank to be trafficable and enable easy access for inspection and cleaning.

ACO's Solution

- **StormBrixx® SD** – geocellular stormwater tank

Benefits

- The unique pillar configuration provides a high void ratio of 97%
- Brick bonding and cross bonding feature which provides unparalleled stability in the construction of the tank
- Maintenance and inspection points allow access to the tanks interior

Other ACO products used

- Commercial stainless steel drainage (ACO Stainless)
