** If supplied from Perth office, add 'WA' to the end of the Part #, for example '142973WA'.

¹ Geomembrane roll can be cut down to size for a nominal cutting fee, contact ACO.

² Prefabricated geomembrane panels up to approximately 1,000m² can be supplied, contact ACO.

³ Non woven geotextile can also be used for infiltration tanks.

Specifications

General

The stormwater Retention/Detention/Infiltration* system shall be ACO Stormbrixx HD as manufactured by ACO.

Materials

The StormBrixx HD tank shall be manufactured from polypropylene with minimum properties as follows:
Vertical strength: 455 kN/m²
Lateral strength: 95 kN/m²
Design Life: 60 years
Frost proof, salt proof and fuel and oil resistant

The stormwater tank shall provide an average 95% open area, holding up to 0.422 m³ (422 litre) per cell (two HD tank half bodies assembled) and offer full access to all areas and levels for maintenance.

Geomembranes/Geotextiles

The StormBrixx stormwater tank shall be wrapped in appropriate permeable geotextile and/or impermeable geomembrane depending on tank use.

Accessories

The StormBrixx stormwater tank shall be used in conjunction with access chambers/plates with rising access shafts and access covers. Pipe connectors with flange are available for connection with inlet, outlet, vent and inspection pipes.

Installation

The StormBrixx stormwater tank shall be installed in accordance with the manufacturer's installation instructions and recommendations
